About

Stefan has been working in web oriented and desktop technologies since 2011. During his college education he worked on web application for creating and viewing virtual web navigations and web application based on geolocation web 2.0 API. From that time he gathered experience working on large scale team projects, medium size freelance projects and small hobby personal project.

Work Experience

ExtensionEngine

Quietstream Financials

Sept.2015. – Present

- Senior Software Developer
- JavaScript, Angular, ES2015, Jasmine, Material design, SASS
- Working with team of developers (15+) on implementing new features for QSF and their clients with main focus on developing Document Management System. Document Management System is very similar to online version of Dropbox combined with specific business logic and integrated with other parts of applications.

Ellevation Education

Aug. 2014. – Sept.2015

- Software Developer
- C#, MVC, MSSQL, Entity Framework, JavaScript/jQuery, HTML/CSS
- Implementing new features for Ellevation the only web-based software platform specifically designed for ELL educators and the English Learners they serve. Ellevation offers educators a detailed look at English Learners. Using Ellevation, educators can review a student's proficiency level, accommodations and more, and monitor current, reclassified, and exited students.

Freelance

AdKontrol

Jun. 2015 – Present

- Senior Software Developer
- JavaScript, Angular, C#, MySQL,
- <http://adkontrol.com/>
- AdKontrol automates the process of logging all on-air occurrences of pre-recorded advertisements on radio and television to produce high-value reporting products for advertisers, agencies, media houses, and regulators.
- Main focus is on creating new reports for AdKontrol application.
